**2026 International Conference on Diagnostics in Electrical  
Engineering (Diagnostika)**

**2-4 September 2026**

prof. Ing. Pavel Trnka, Ph.D., MBA  
General Chair

## Invitation

On behalf of the Organizing Committee, it is my honor and pleasure to invite you to the 2026 International Conference on Diagnostics in Electrical Engineering (Dignostika). The conference will be held at the Parkhotel Pilsen, Czech Republic, from September 2–4, 2026, and is organised by the University of West Bohemia.

I would like to again create a pleasant platform for the scientific exchange of experience for experts in diagnostics, measurement systems, and electrical manufacturing.

I look forward to seeing you in Pilsen.

# Information for Partners

The Diagnostika conference has a rich history dating back to 1993, when the first edition was held. It is traditionally organized by the University of West Bohemia (UWB), Faculty of Electrical Engineering, in cooperation with the IEEE Czechoslovakia Section. Over time, it has evolved from an initially local event into an international gathering. Diagnostika, fully titled the International Conference on Diagnostics in Electrical Engineering (CDEE), is a biennial scientific conference focused on sharing the latest advancements and developments in the field of electrical engineering diagnostics. It serves as a key platform for scientists and experts actively involved in electrical engineering, materials science (including structure, features, and applications in electrical systems), and related diagnostic methods. In addition to its scientific program, the conference also offers a space for company presentations and exhibitions, thereby providing a valuable opportunity for professionals to exchange knowledge and research findings.

## Participants of previous CDEE events based on country origin

Scientific papers from 17 countries.
